About PSS

What We Do

Public Safety Systems (PSS) acquires and sustains emergency management capabilities aboard United States Marine Corps (USMC) Installations, providing interoperable, secure, reliable, survivable, and versatile wireless communications networks solutions for Emergency Management communications.

Additionally, PSS provides solutions to enable command and coordination dispatch functions for Marine Corps Emergency First Responders, supporting day-to-day emergency operations.

How We Help

PSS standardizes command and coordination of emergency dispatch centers, fire station alerting and multi band radios and functions for First Responders providing notifications, resource management and situational awareness, including wireless communications, networks, and infrastructure.

Leadership

Portfolio Manager

Steven Mullen, USMC

Deputy Portfolio Manager

Vacant

PSS is one of seven portfolio offices in PEO Digital and Enterprise Services (PEO Digital). PEO Digital is the Department of the Navy's (DON) enterprise-wide information technology acquisition agent tasked with digitally transforming systems to evolve and deliver modern capabilities and technologies to maintain the competitive edge while meeting demand signals from the DON's user communities.

For more information about PEO Digital, PSS or the seven other portfolios offices, visit our website at:

Public Safety Systems (PSS)

Service Families

Consolidated Emergency Response System (CERS)

CERS provides command and coordination dispatch functions for first responders to support emergency management missions on Marine Corps installations while also supporting civilian mutual aid partners. CERS also standardizes dispatch centers to provide notification functions, resource management, and situational awareness to increase efficient emergency and day-to-day first responder operations.

Enterprise Land Mobile Radio (E-LMR)

E-LMR provides interoperable, secure, reliable, survivable, versatile wireless communications network solutions for Emergency Management and emergency management communications. E-LMR provides modern, digital, Association of Public Safety Communications Officials Project 25 (APCO P25) Phase II Trunked radio system at all Marine Corps Installations.

Public Safety Network (PSNet)

PSNet is a closed network that is owned and managed by Commander Naval Installations Command (CNIC) N6. The network leverages existing transport capabilities within the Department of the Navy for operational centers that dispatch, monitor and support emergency services personnel and equipment in all types of emergency situations. The mission of the Public Safety Systems (PSS) program is to deliver capabilities equivalent to those in a U.S. civilian dispatch center and provide the seamless ability to handle all emergency management communications functions through all forms of communications mediums as well as supporting information technology infrastructure.
